

In **UP Lifting**, the establishment of an environmental and quality management system focused on processes and thinking based on risks and opportunities is considered an essential element in order to ensure the success of the Company.

For this we established a quality and environment policy taking into account the purpose and context of our organization, within the framework of the following developed activities:

Design, manufacture, commercialization and technical assistance of lifting equipment for civil and military use.

The facilities are located at Avda. Pebreda, 25 – Plataforma Logística Huesca Sur (PLHUS), Huesca.

The management system of **UP Lifting**, based on UNE-EN ISO 9001:2015, UNE-EN ISO 14001:2015 requirements and PECAL/AQAP-2110 requirements, aims to define, systematize and control all the phases or activities related with the quality of the product, customer satisfaction and the prevention of contamination using the following general principles:

- Commitment to improve manufacturing processes and services as well as a more efficient environmental performance.
- Responsibility to comply with all requirements whether legal, contractual or of another character which are applicable to our activity, so that no action of **UP Lifting** breaches any of the requirements or specifications set down by the relevant parties.
- Commitment to control efficiently all the processes in order to offer to our client's products and services with great quality at competitive costs.
- Adoption of commitment on the prevention of contamination and reduction of impact on the environment, managing all operations and processes generated by **UP Lifting**. We seek to promote sustainable development, controlling the waste and emissions generated and using resources responsibly.
- Commitment to publish and promote within the organization our policy of quality and environmental management by communication and continuous training of our employees.

Annually, the Management of **UP Lifting** will establish objectives of quality and environment based on this policy, in order to ensure the efficiency of the environmental and quality management system.

All employees are directly responsible for quality in their daily work. Therefore, all have to be aware that their collaboration is essential for the attainment of the annual objectives regarding quality and environment.

This policy is periodically reviewed by the Management, in compliance with the purpose, context of the organization, environmental impacts and strategic management. It is published, understood and applied within **UP Lifting** and is available to the concerned parties.
